

Choosing project topic

First of all, choose a suitable topic for the project:

- **Consider the background of students, e.g. age, level, interests.**
- **Make sure the topic is interesting and relevant.**
- **The topic should be challenging but not too difficult.**
- **The topic should ideally allow imaginative and creative thinking.**
- **The topic should be able to sustain interest for the whole duration of the project.**
- **The topic could tie in with a topic recently covered in your teaching and/or in other content subjects.**
